Our Story

In the vast ocean of global trade, where precision, speed, and sustainability steer success, MOL Information Technology (MOL-IT) emerges as the digital compass guiding MOL Group into the future.

Driven by a transformative vision, MOL-IT spearheads technological and sustainable innovation in line with MOL's Digital Transformation (DX) goals. Leveraging its experience in application development for shipping solutions, and with the addition of automation, cloud, data intelligence, and cybersecurity, it boosts efficiency, agility, and innovation—empowering smarter, data-driven decisions thus focusing on building a resilient, future-ready IT landscape for maritime operations.

As a key part of the Headquarters of Technological & Digital Transformation, MOL-IT is a strategic driver—not just support. It builds robust IT systems, leverages global data, and strengthens cybersecurity to help the MOL Group navigate the digital era with confidence.

Our Inner Compass

Syncing Business and Technology

As a global ICT leader in the Shipping & Logistics sector, MOL-IT is dedicated to empowering the MOL Group with smart, scalable digital solutions. We focus on digitizing core operations and delivering innovative technologies that adapt to evolving business needs—ensuring agility, efficiency, and long-term value across global operations.

A Voyage of Progress

1998 – The Beginning

MOL-IT began its initial journey from Hong Kong to support the Container Shipping (Liner) business of MOL. A project office was later started in Kolkata, under Mitsui O.S.K. Lines (MOL), laying the foundation for what would become a key player in MOL's digital transformation.

The project office evolved into a full-fledged company: MOL Information Technology India Pvt. Ltd., marking a significant step toward independence and growth.

2006 – Bigger Dreams

2009 – Expansion to Chennai

With growing operations, MOL-IT expanded its footprint by opening a new office in Chennai, strengthening its presence in India.

For over a decade, MOL-IT primarily supported MOL's MCS, Container Shipping, and Pure Car Carrier businesses, building deep domain expertise.

2017 – Anchored in Core Business

A new chapter began as MOL-IT started collaborating with MOLIS, with ownership shifting to MOL Headquarters. This initiated a slow but steady transformation towards broader technological capabilities.

2018 – A Turning Point

The journey into Business Intelligence began, marking the start of a strategic shift toward data-driven solutions and innovation.

2019 – Embracing Business Intelligence

We expanded our portfolio to include Information Processing Services (IPS) for which new offices were launched in Hyderabad and Mumbai.
MOL-IT achieved ISO 9001:2015 certification, reinforcing its commitment to quality and excellence.

2022 – Growth and Recognition

A proud moment as MOL-IT celebrated 25 years of its journey, reflecting on its legacy and looking forward to the future.

2023 – Celebrating 25 Years

A new logo marked a turning point in MOL-IT's journey.
The first-ever visit from MOL's President and Vice President signaled its growing significance.

2024 – A New Era Begins

Becoming an integral part of MOL's Corporate Organization, under the Technological and Digital Transformation Unit.

2025 – A Strategic Arm of MOL

From Dock to Deck
Our Products

MOL CONNECT

The MOL Data Bank

A smart, multilingual information hub for profiles of all MOL Group companies and employees.

- Enables intelligent search

- Supports business continuity

- Flexible, reusable, and scalable

UBeSafe!

Your New BCP Assistant

A cloud-based, real-time staff safety confirmation system for emergency situations and your business continuity plan.
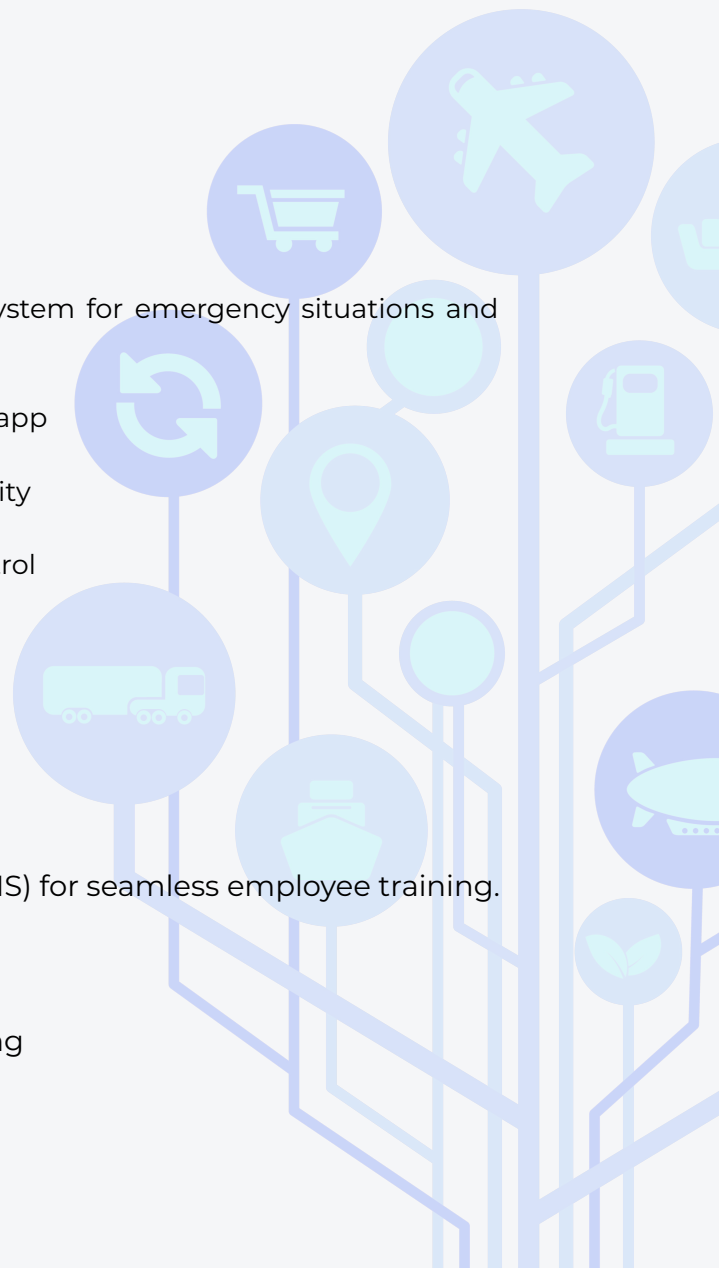

- Two-way communication via email, SMS, or mobile app

- Real-time updates on employee safety and availability

- Empowers management with full visibility and control

KNOW NOW

Learning @ Anywhere, Anytime

A cloud-based Learning Management System (LMS) for seamless employee training.

- Role-based training on a unified platform

- Full control over course coordination and tracking

- Designed for learner comfort and flexibility

Navigate Smarter
Deliver Better
Our Services

Powering Digital Futures

- **Application Development**: Scalable shipping and supply chain applications.

- **Mobility**: Smart solutions for seamless, sustainable, and profitable operations.

- **Business Intelligence**: Real-time insights via Tableau dashboards.

- **AI Forecasting**: Predict trends and visualise data for faster decisions.
